PERSONAL STATEMENT

I have dedicated my career as a lecturer at the Department of Nutrition and Food Safety, Can Tho University of Medicine and Pharmacy, Can Tho City, Vietnam since 2008 with background of a general medical doctor degree. I also graduated master of public health degree in Australia in 2012. Apart from the role of teaching and scientific research related to community health at the university, my study interests are focused on understanding the nutritional status of human beings through each period of lifecycle in different settings from clinical contexts to communities. Some of studies were conducted on young adults, elderly, in-patients and children. The outcomes of these studies contributed to explore relationships between nutritional status and a various of social, economic and cultural factors and health behaviours of food intake and lifestyles in Vietnam. I hope that my work may contribute to improve nutritional status of different target population in the community in Can Tho City and Mekong Delta.
